**Subject:** PAY RAISE PLAN:

### **PAY RAISE PLAN:**

The RaPower3 Renewable Energy Tax Credit Program eliminates your federal income tax liability while increasing your take home pay, all guaranteed by Congress. Don't you deserve the same tax privileges General Electric uses to pay no federal income taxes?

### **Simple Three Step Plan:**

**1. Modify your W4 Form:** Because you are participating in this tax credit program, you no longer will be paying federal income tax due to Congressional tax credits and incentives. Fill out the form; on line 5 write in 25 for the number of allowances. Think of it this way, "Because I am participating in this tax credit program, I am allowed to claim 24 allowances." This stops the flow of money to the IRS and into your checking account.

**2. Enroll:** into the RaPower3 Renewable Energy Tax Credit program making a down payment on the number of systems needed to wipe out your taxes, and also your past taxes, which will be refunded to you.

**3. Purchase:** Each month you make an another down payment on additional systems which add to your business. Keep the rest of the increase in your take home pay to use as you wish.

**Everything else is just details:** Watch this video link which explains the program:

<http://vimeo.com/21065682>. Be sure to go to [http://rapower3.com/current\\_news.shtml](http://rapower3.com/current_news.shtml) and read about the IRS Refunds this year.

---

Example: For the average two income household having a taxable income of \$72,500 and a tax liability of \$10,500 where each month \$875 is withheld from their paycheck. RaPower3 Enrollment can produce the following results: A net increase in take home pay of \$560 with a purchase of three renewable energy systems each month for the rest of the year.

At year's end, therefore, they have made an initial down payment on 24 RaPower3 Renewable Energy Systems. Each system qualifies for a \$1050 federal income tax credit. You will receive an IRS Refund Check of at least \$28,700. These funds come from the recovery of income tax you have already paid in 2006 -2011. With these funds you would pay the remainder of your down payment on 24 systems, \$22,680; the rest you get to keep. Remember, you also have received an extra \$560 for May-DEC amounting to another \$4,480, and you will also get back the \$3,500 already paid in JAN thru April.

Your initial benefits for this year, therefore, amount to \$10,500 and the government buying you into your own renewable energy business that can pay you \$3,600 a year for 35 years. These tax benefits are guaranteed to you by Congress and the government. How often have you heard the government express their desire to develop the Green Economy? This is Congress's main program to attract private sector

Gregg\_P&R-000717

money into the industry.

In addition, this year Congress allows you to depreciate 100% of the \$3500 retail value of your equipment (minus one half of the tax credit) which amounts to \$71,400 which is an adjustment to income thereby reducing your taxable income to \$1,100 and \$111 in tax due (securing just one more system would wipe out taxes entirely and produce excess adjustment to income that would carry over to your 2012 tax liability.

In addition, right now – for a limited time only – RaPower3 will pay an additional \$6,000 Bonus for each system purchased. That amounts to qualifying for an addition \$18,000 in Bonus money each month the Bonus is in effect. The Bonus will be paid out of the first \$1Billion in gross revenue of the company.

Finally, this green energy tax credit program is renewable each year through 2016, so your RaPower3 business will pay you \$Tens or thousands if not \$Hundreds of thousands of dollars for the life of the equipment, 35 years.
