---

I sent this out today to people who have inquired like you have done in the past.

Feel free to pass it along to people that you have shared the RaPower3 Story with. I feel a responsibility to those that have inquired in the past. I certainly do not want them to question me in the future about letting them know about RaPower3.

For example, those people that got involved last year when the \$6,000 Bonus was ending are not getting their IRS refunds and are very happy clients just like those clients that attended last year's national convention and bought IAUS stock who have doubled their money since then are happy as well.

WE'RE GOING GREEN!

RaPower3 Update: 2/2012

Everyone:

I got a phone call from a teacher from the Midwest this week. Two years ago she heard the RaPower3 story and thought she'd try it to see if & how it would work and bought 1 system. Her 2010 taxes were reduced and her normal modest return was increased @ \$1500.

Since that worked so well for her, this year she decided to follow the directions on the RaPower3 website, i.e., multiply the number recorded on Line 55 of Form 1040 by .0007, round up and order that many systems to zero out her 2011 taxes.

This was the reason for her phone call, "Can it really be possible to get all these taxes back?" of course the answer is true and her return will amount to \$8,7500 this year (65% of which will complete her down payment to RaPower3 – she will pocket the rest: \$3,062.50. AND she has an additional \$2,500 credit that she can either apply to 2012 taxes or file a 1040X Form and recover from her 2010 taxes - That's \$5,562.50 of actual money into her pocket.

She will be allowed to continue this same process each year through 2016, the systems she purchases will pay her residual income for 35 years and she qualifies for over \$40,000 in Bonus money.

You can do the same. BUT, you have to decide quickly because the \$2,000/system Bonus Program expires FEB 29. You will remember that the original Bonus program was set at \$30,000 and gave way to a \$6,000 Bonus Program which gave way to the current \$2,000/system Bonus Program.

At each major stage of development, the Bonus has been reduced, and as the IAUS energy fields are about to be erected, the \$2,000 incentive bonus will no longer be necessary

Gregg\_P&R-001212

Study the website, look at the number on Line 55 of your 1040 Form - all that money can be recovered and put to work making you money, and give me a call to have your questions answered and get in on this once in a lifetime chance. The program is repeatable through 2016. Most of you have passed on the 2009 and 2010 tax advantages & paid tens of thousands unnecessarily to the IRS as well as let the \$30K & \$6K Bonuses slip away. The Last Chance at your 2011 Tax Return & the \$2,000 Bonus is on the table right now. The ball is in your court.

We have sold over 15,000 of these systems and helped out over 500 people just like you with this program producing almost \$16Million in Tax Credits for averages Joes just like you and me putting money into our pockets making it easier to face the pain at the pump and checkout counters we all face these days.
