Subject: Update

RaPower3 wants to make sure your tax professional is keeping you up to date regarding an important federal energy tax credit program available to all taxpayers. The Stimulus Package passed in 2008 supported energy efficiency and renewable energy as a way to stabilize the American economy, creating jobs and putting control of energy back into the hands of Americans. This package allowed for an energy tax credit to be taken on the purchase of equipment that has the potential to generate solar energy each year through 2016. We have access to a patented solar technology that qualifies for these tax programs.

Last year a special tax advantage only available until the end of this year, 2011, further enhanced the program and is dramatically affecting taxpayers, saving each many thousands of dollars in taxes. You may or may not have heard, but taking the time to educate yourself produces substantial benefits.

In fifteen minutes the video link (<http://vimeo.com/21065682>) gets everyone up to speed on all pertinent information in one succinct presentation. Hundreds of taxpayers like yourself have already positioned themselves ahead of the curve leveraging their advantages after viewing this presentation. Everyone's tax situation is different. Customizing a program unique to you produces substantial tax advantages for this and upcoming years. View the video, gather your information, and call me to get a report on how taking advantage of current tax law would benefit you.

I conduct two weekly nationwide conference calls further explaining the program every Sunday and Thursday evenings: 9:00 PM Eastern - 6:00 PM Pacific time. I have a powerpoint presentation you can view by logging into www.freescreensharing.com and joining our meeting by entering the code: 341496262. Then join us on the phone by dialing: 559.546.1200 - ACCESS CODE: 341496262#.
