### Tax Benefits

Tax incentives have never been better for renewable energy equipment purchases. And, there has never been better renewable energy technology than now with RaPower3.

## Earn a 60% Return in Just Months in the Form of Tax Credits or Realized Tax Savings

Starting a new business is usually hard and costly. Not with RaPower3. With the rental fees and tax credits, it is possible to make a 60% return in just months in the form of tax credits. This is predicated on purchasing your number of lenses correctly (see calculate lenses). Then, for 30 years, your solar lenses are profit makers as you'd make a 4.6% return every year for 30 years.

### Getting a 60% Return\*

- Pay \$650 per solar lens this December.
  - Get \$1,050 back per solar lens next April (Tax Credit).
  - You Make \$400 per solar lens. That's a 60% return!
  - Get \$30 per lens per year in net rental fees for 30 years. A 4.6% return per year (based on the \$650).
- \*This does not include any additional money you make from commissions.

### How In The World Can This Possibly Happen?

When you purchase RaPower3 Solar Lenses, you sign an Equipment Purchase Agreement with RaPower3.

- **Full Purchase Price:** \$3,500 per solar lens (you get a 30% tax credit, or \$1,050, based on this purchase price).
- **Down Payment:** \$650
- **Balance Due:** \$2,850
- **Financing Terms:** Annual payments of \$120 per solar lens are required for a term of 30 years. However, another part of the rental income is \$120 per lens and that takes care of the annual payments. You never have to take another dollar out of your wallet after the original \$650 per lens is paid.
- **Superior Technology:** No other solar company or energy company can make this kind of deal work. It's all because of our superior cost effective technology.

### LTB, LLC Agreement

When you purchase RaPower3 Solar Lenses, you also sign an Operation & Maintenance Agreement with LTB, LLC.

- LTB, LLC rents your solar lenses from you for \$150 per year for a 30-year term.
- LTB, LLC operates and maintains your solar lenses.
- LTB, LLC intends to use your solar lenses to produce income and profit.

### Rental Income

- **Your Purchase:** Each lens you buy yields you \$150 a year for 30 years, which equals a total of \$4,500. Out of the \$150 Rental Fee, \$120 goes to pay off the Balance Due you owe on your lens and \$30 goes to you every year for 30 years. This leaves you with a NET profit of \$900.
- **Just For Fun:** How much would you make per year and over 30 years, if you owned a total of 50 solar lenses? (See answer at bottom of page).

### 1099 Forms

- A. RaPower3 issues a 1099-MISC IRS Form on your RaPower3 income if it is over \$600.
- B. You pay taxes on income made.
- C. Long-Term Strategy: Some RaPower3 Team Members purchase additional solar lenses to help our nation, minimize their taxes, and add to their rental income portfolio.

### Bonus Income

Currently, there are no Bonus Referral Contracts available.

### Commissions

RaPower3 also has a direct sales marketing component built into its business model. Everyone who purchases lenses is automatically placed under their sponsor and becomes a RaPower3 Team Member. As a RaPower3 Team Member, you may introduce our program to others and help them purchase lenses online. Commissions of seven percent of the down payment are paid on the lenses you sell. You also make seven percent on the lenses your customers sell. Commissions of seven percent are paid only two levels deep. No other commissions are paid.

### Answers:

#### Just For Fun

1. How much would you make per year and over 30 years, if you owned a total of 50 solar lenses?  
Answer: \$1,500 and \$45,000
