## Site Tours

RaPower3 member's lenses are currently being installed on towers at our site in Central Utah. If you would like to go to any of the scheduled tours to the site, please RSVP via email to [greg@rapower3.com](mailto:greg@rapower3.com). Private tours on special dates may also be arranged. If you are coming from out of state, you will want to fly into the Salt Lake International Airport. The site is a two and a half hour drive south of Salt Lake City.

### TOUR DATES:

#### Regular Tours

Includes Ra3 Packet, lunch on us at the grid home, 30-60 minute instruction, Q&A session, and tour of both the manufacturing plant and the project site.

- April 30th, 2014
- May 29th, 2014

#### "Bring a Guest" Tours

Includes lunch on us at the grid home, 30-60 minute explanation of the RaPower3 program, Q&A session, and tour of both the manufacturing plant and the project site.

- April 10th, 2014
- May 15th, 2014
- June 11th, 2014

#### MEGA Tour

Includes lunch on us at the grid home, In-depth report from Neldon Johnson (IAS CEO), our Engineer, and Greg and Matt Shepard, Q&A session, and tour of both the manufacturing plant, the project site and future sites.

- June 27th, 2014

### PAST TOUR REPORTS:

March 27, 2014

#### Report:

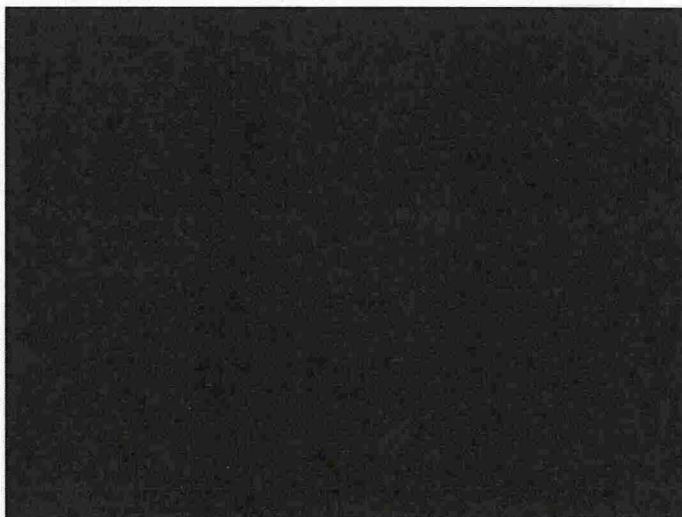

Another great tour was had under beautiful weather. Tour guests were again treated to seeing the turbine run with the heat exchanger and molten salt container. It only takes about two minutes to get it running. Very cool. Out at the project site, workmen were putting the new dual-axis tracking systems on the towers with the new and larger rams.

March 13, 2014

#### Quote:

"Greg and Matt. Thanks again for the great tour last week. I just got the lens piece out of my folder and tried it. It actually works! Very

cool. Just thought that I would email you to let you know."

"Neldon Johnson of IAUS and Greg Shepard of Rapower3 have done amazing work! It's nice to see such great fruits of their labors coming together!"

"All the pieces are coming together in a fantastic way! Watching the turbine run with all it's components was certainly the highlight of the trip! This ride is going to be fun!"

#### January 3, 2014

Quote:

MG, a RaPower3 team member from Salt Lake City, Utah said this after the tour:

"I am so glad I went on the tour. It is incredible how much is going on. They really are ramping up for big things."

#### December 18, 2013

Quote:

PFO, a RaPower3 team member from Salt Lake City, Utah, said this after the tour:

"The latest tour was awesome. Rapower3 and IAUS are about to bring revolutionary technology to the market!"

#### December 2, 2013

Quote:

Ryan Cook, a RaPower3 team member from Houston, Texas, said this after the tour:

"We are on the brink of doing something really big. This technology is going to change the world!"

#### November 21, 2013

Report:

A number of shipments of components, parts, and manufacturing equipment will be coming in this week and next. For example; equipment to automate the framing of lenses. Looks like it will be able to frame at least 10 solar lenses per minute. That's 60 an hour-480 per shift minimum.

One of the highlights of the tour was watching the workmen assembling the heat exchangers for the biomass operation which is placed right next to the main solar terminal. We will be able to then produce about 10,000+ hours of heat per year. That's four times the production hours of our CSP (Concentrated Solar Power) competition. We can use the heat to produce electricity on the grid, for a separate building or private property, provide heat and or water for a greenhouse or just water to ease drought conditions.

#### October 30 2013

##### October 18, 2013

Report:

October 18th, was a beautiful day in Delta. Great for the tour of RaPower3 Members and shareholders. Lots of work was being done at both the manufacturing plant and the project site.

"There's been more progress in the last six months than the prior ten years!"

-- S.H.

##### October 10, 2013

Report:

"I have been to see the Delta site a few times. This time was especially exciting. You could tell that substantial progress has been made and that everything is coming together and being finalized. Neldon was great to spend some time talking with us. Great tour."

-- P.F.O.

"Thanks for a very enjoyable trip to Delta. I was amazed at the progress made at the site. After seeing first hand the technology and meeting with Neldon, any doubts about this technology are gone! This will change the world. I look forward to the future with great excitement. I'm proud to be a part of it."

-- Greg L.

"I want to thank you for hosting the Oct. 10 tour of the manufacturing plant and solar tower field in Delta, and the informative meeting with Neldon Johnson and Jeremy. The combination of Jeremy's technical skills in mechanical engineering and Neldon's genius for conceiving and developing innovative technologies at International Automated Systems, Inc. (IAS) would be the cornerstone of any top tier high tech corporation, and I'm fortunate to have the opportunity to be a member of RaPower3 which markets IAS solar lenses through its distribution network. The level of progress made at IAS and RaPower3 within the past year is truly remarkable! I'm confident the RaPower3 opportunity will continue to expand for many years to come."

-- David

### September 19, 2013

Report:

Engineer finished mass production programming for heat exchanger machine. Saw pipe insulation process, the new stainless steel braided hoses installed, the new installed breaker box and the new horizontal position of the turbine, heat exchanger, three-phase generator and the 750-degree hydraulic fuel container.
