I suggest you read the K-M memorandum along with the Anderson tax attorney opinion letter. Other areas to dig into, is to read the TAX INFO section on rapower3.com. We also recommend to keep updated on our daily progress and the results of the IRS "expert witness" coming to Delta on December 18th. This will mark their first ever visit to see our technology in person.

Remember, the DOJ has said, "The IAUS technology has never worked and never will work." Pretty audacious for not actually seeing anything.

Did the IRS "expert witness" show up on the 18th as stated?

No. The expert witness did not show up as scheduled. We asked them to sign a non-disclosure agreement along with a protective order. This request was made to protect our patents and technology.

The Salt Lake City IRS office thought this was reasonable, but Washington D.C. did not. Therefore, nothing was signed. Our attorneys claim this latest game by our adversaries was highly unusual.

So, I'm thinking now it may be sometime in February.

Chief,
Is it fair to say that by February, the Manufacturing part of the equation should be complete and IAS/RaPower3 should have TOWERS UP AND PRODUCING ELECTRICITY TO THE GRID!!!!
If this is true, then the DOJ statement that "The JAUS technology has never worked and never will work".....SHOULD BE RENDERED MEANINGLESS!!!!
Is this logical??????????

That's the goal and it's reasonable.

Sunnyday,
Correct me if I am wrong....BUT THERE ARE STILL 20 DAYS LEFT IN THE MONTH OF FEBRUARY!!!!!!
The bottom line- even if we have to wait a little longer is THAT JAUS' IMO WILL TURN OUT TO BE

Goodbet
February came and went I guess it wasn't a reasonable expectation as predicted. Oh well I think we will be like the highwaymen. We are going to around and around and around with this company great song by the way.
