

Greg -

Again you hung up on our conversation today when you brought up the subject of my brother coming up with the 5% commission money.

As I have been telling you, I am not in agreement with this procedure, i.e., taking money from this non profit that has been receiving 10%, is expecting 10% as always and has been reported to county government officials who are expecting this to continue. How would it look that all of a sudden thousands of dollars are paid to the brother of the administrator of the funds? That just does not pass the smell test, especially to government officials.

RaPower3 & you as "Chief Dr of Operations" sent me into the field to organize fundraisers. You & Ra3 said that I would receive a 5% commission for establishing the fundraiser. I went out and did just that, at times while doing BFS Business & at times on my own expense. These were started in OH, IN, IL, MN, ID & others. The total number of systems sold so far is fast approaching 1500. These people continue to purchase additional systems to receive the tax benefits & will do so thru 2016, so the total number of systems will continue to rise; 1500 systems X \$1050 dwn payment X 5% = over \$78,000 - not to mention any bonus monies or 35 year rental income.

After I went to the time, trouble, effort & expense of starting these fundraisers, you informed me that I would not be receive any 5% commissions & to no longer establish further fundraisers. I had no choice but to accept this decision. I have not made an issue of this. But you continue to bring it up. Now you want someone else to take money from they now expect to receive & divert it to me. Richard Freeborn, the administrator of donated funds to Meadowbrook Park, should not be expected to pay me commission money. If I were to be paid any commission, it should come from RaPower3, just like other commission checks.

I only asked, since you informed me that half of the commission money that comes from the deals I am able to establish will have to go to you & that you get to decide who makes what on the sales that are established thru the work that I do, for some \$\$\$ to help with expenses associated with this work. Just like this weekend, I am presenting to a group that has 500 acres and money to develop it. I will be spending @ \$1250 to do this. I just thought that since I have many projects lined up for IAS technology & development & you will profit from the sales I line up with little or no effort, that perhaps I could get help with some of the expenses.

I should have never asked or expected any help with expenses from someone who denied \$78,000 in commissions. In fact, when I talked about the expenses I incurred when presenting to folks in FL & TX, you answer was, "You didn't ask for permission to go."

I have lived with your decision for over two years, have not said anything, nor brought it up. I continued to work the program and have sold thousands of systems through my team and downline. For you to continue to hang up, to not talk to me regarding the development of the business, to cuss and swear at me & use the F-word is just not anywhere near what I expected from you or someone in your position. I have said nothing to anyone about not getting the \$78K to anyone. Just what do you think the team leaders in our downline would say, do or think if they knew that a fellow distributor was denied \$78K that was promised to them?

Over the years there have been numerous statements, promises, & things you have led me to believe that simply are not true – like being paid a 5% commission on these sales. I have had to learn to accept this and still work to develop the downline despite the falsehoods. The downline that you profit from with every sale that is made, as well as BFS, as well as Bob R, and your businesses that you run BFS through.

I stand ready to continue to build the organization. I have over 1,000 acres of land ready to be capitalized and developed as solar/biomass power fields. The question that I have for you, Neldon & Glenda is that should I continue to work the program or should I just walk away with the contracts that I have inked over the last 4 years?
